Problem: after upgrading to Internet Explorer version 7, you get a
             security warning when you run the housing program over a network.
   The security warning says the "**publisher can not be verified**"
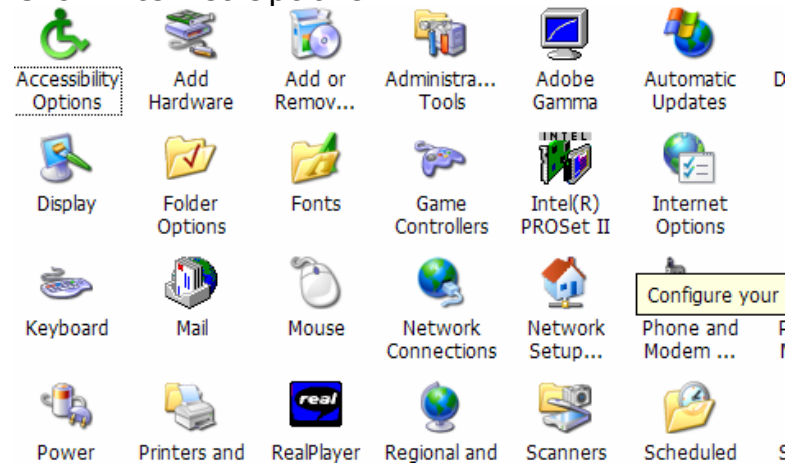

Solution:

1) Click the Start button

2) Click Control Panel

My Network Places

Control Panel

Set Program Access and
Defaults   Provides options for you to customize the appearance and functionality
                  of your computer, add or remove programs, and set up network
Administrative   connections and user accounts.

Connect To

3) If you are using the Category View   **OR**   3) If you are using the Classic View
Click Network and Internet Connections   Click Internet Options

Pick a category

Appearance and Themes   Printers and Other Hardware

Network and Internet Connections   User Accounts

                                Connect to the Internet, create a home or small
Add or Remove Prog   office network, configure network settings to work
                                from home, or change modem, phone, and Internet
                                settings.

Sounds, Speech, and Audio Devices   Accessibility Options

Accessibility Options	Add Hardware	Add or Remov...	Administra... Tools	Adobe Gamma	Automatic Updates	D
Display	Folder Options	Fonts	Game Controllers	Intel(R) PROSet II	Internet Options	
Keyboard	Mail	Mouse	Network Connections	Network Setup...	Configure your Phone and Modem ...	
Power	Printers and	RealPlayer	Regional and	Scanners	Scheduled	S

3b) Then click the Control Panels Internet Options (Category View only)

Pick a task...

→ Set up or change your Internet connectio

→ Create a connection to the network at yo

→ Set up or change your home or small offic

→ Set up a wireless network for a home or s

→ Change Windows Firewall settings

or pick a Control Pa

Internet Options

Network Set   Configure your Internet d
             settings.

4) On the Security tab, click Local Intranet

nternet Properties

| General | Security | Privacy | Content | Connections | Programs | Advanced |

Select a zone to view or change security settings.

Internet   Local intranet   Trusted sites   Restricted sites

Local intranet
This zone is for all websites that are
found on your intranet.
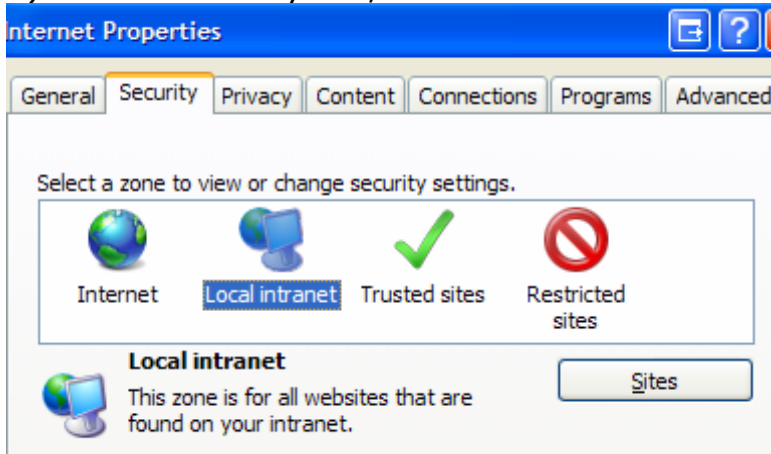

Sites

5) click the Sites button and make sure
Automatically detect intranet network is not checked
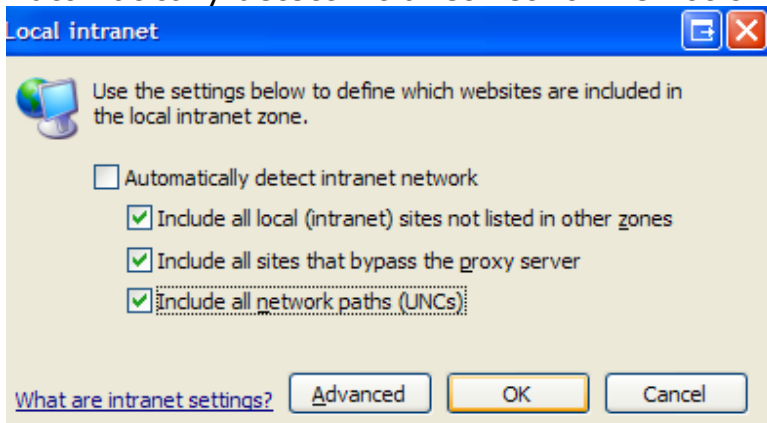

6) click OK buttons to close local intranet and internet options windows

If this doesn't solve the problem, try this…

5) check Automatically detect intranet network
And then remove checkmarks from all three boxes below it
